

EDUCATION IN THE FIELD OF DEVELOPMENT POLICY IN AUSTRIA

For many years, TwoWings has gained important experiences in the development cooperation with projects in the whole world. In Austria, there are many people as well particularly in the academic field - who would like to become active in this area or show a strong interest in topics concerning the global struggle against poverty and would like to advance sustainable developments.

Since 2005, TwoWings offers numerous workshops and seminars especially for students in an annual cycle, in which concrete development projects are reviewed as well as principles and attitudes for sustainable development cooperation are consulted about together.
